New York's Dark Story

Welcome to the mean streets. Here the bustling metropolis of New York shows a different face. Now there is neither law nor order in a place where "might makes right." You know it well because you are...the Vigilante.

Your girlfriend, Madonna, has been kidnapped by a savage street gang. You must make a single-handed raid into enemy territory to save her. Downtown, in back streets, in junkyards and across bridges, you take on the toughest crew of bad guys ever—including skinheads, punks and thugs. You must fight every inch of the way with your bare hands, and when you can get them, nunchaku. Get ready for some brutal hand-to-hand combat on the toughest turf around! Madonna is depending on you!

Good luck, Vigilante!

Operating Controls

The movements of Vigilante are controlled with your TurboPad:

Break Loose!

Whenever a thug grabs hold of you, repeatedly tap the Direction Key to the left and right and press Button I or Button II.

Eight different Vigilante movements are possible

- | | |
|--------------------|---------------|
| 1. Punch | 5. Jump |
| 2. Jump Punch | 6. Kick |
| 3. Crouching Punch | 7. Sweep Kick |
| 4. Jump Kick | 8. Crouch |

Status Display

As you go against each level of street thugs, watch the status display above the main play area. It not only indicates individual player scoring but also time remaining,

energy levels of all players and the Street Gang Boss, plus high score and number of players remaining.

Vigilante Energy Gauge

Enemy Energy Gauge

If the Vigilante Energy Gauge reaches zero, or if TIME (Time Remaining) reaches zero, you will lose one life.

The ENEMY Gauge represents the remaining strength of each boss character. When it reaches zero, the Gang Boss has been defeated.

You begin with three PLAYERS. When your last life is lost, the GAME IS OVER.

When the score reaches 5000, you will be awarded another Vigilante.

It is possible to continue your game up to 3 times.

When you defeat the Big Boss on the fifth and final stage, GAME IS OVER.

Movements and Point Values for Thugs, Skinheads and Bad Guys

Tough Brothers

(1000 points)
Extremely quick movements and frequent somersault jumps make the Tough Brothers very challenging opponents. The Tough Brothers work as a team and rely on excellent jump kicks.

Skin Head

(500 points)
An explosive Boss who throws dynamite and guards the entrance to Big Boss' hideout.

Axe

(500 points)
Chokes the Vigilante and delivers a tremendous punch. You must overcome a bat-wielding Thug before attacking Axe.

Big Boss

(500 points)
The toughest Boss of all! Big Boss uses vicious kicks and punches while Madonna looks on helplessly.

Spike Boss

(500 points)
Attacks with a spiked iron ball that swirls rapidly overhead.

Crow Bar

Attacks with an iron bar.

Hit Man Joe

Uses a handgun—watch out for bullets.

Chain Gang

Uses chain like a whip.

Strangler

Strangles the Vigilante. Attacks with other gang members to pin down the Vigilante and deplete your energy.

Hell's Angel

Attacks on top of a motorcycle—very dangerous!

Dirty Jack

Uses a switchblade.

Red Mohawk

Punches hard and fast whenever the Vigilante draws near.

Playing Tips

Master the technique of attacking while jumping at the same time. This is extremely helpful, especially if you have the nunchaku. The third level Boss can only be attacked in this manner, so practice in the early screens.

Pick up the nunchaku whenever you can. They not only increase the effectiveness of your attack, but are much faster and easier to use. The nunchaku are very effective when you are surrounded by gang members!

When the Vigilante uses a punch attack, the street gang member will temporarily offer no resistance. With street gang members that

carry weapons, this means you may sweep in and initiate an effective attack without fear of reprisal. If the street gang member is up above you, attacking with a jump punch will be effective.

When the Vigilante attacks with a kick, the street gang member will temporarily fall back and then come in for a counterattack. This situation can be very advantageous when the Vigilante is caught between two enemies. By attacking them alternately, you can subdue them without sustaining any injuries (the timing of the attack is crucial!).

Be careful of the motorcycle-riding thugs at the beginning of the third stage. Collision with their bikes is very harmful! You must jump and kick while the bikers whiz by underneath. If done properly, you will knock them off and their bikes will explode behind you.
